

Your indoor climate up to standard in all weather conditions!

The new standard for sustainable building

- Fully thermally separated
- Suitable for air supply and smoke and heat extraction
- Energy efficient natural ventilator
- Optional weather-independent ventilation setting
- Optimum daylight access
- Applicable in façade and roof

Three louvre settings

Fully opened Maximum air passage for smoke and heat extraction/natural ventilation.

Ventilation setting (optional) Weather-independent ventilation by means of rainproof louvre setting.

Closed And closed means closed! Minimum air loss thanks to the highest airtightness value in the market.

Fully open

Ventilation setting

Closed
